

Review of: "Exploding AI-Generated Deepfakes and Misinformation: A Threat to Global Concern in the 21st Century"

Bohai Zhao

Potential competing interests: No potential competing interests to declare.

AI-generated deep fakes and misinformation have emerged as critical issues in the current technological landscape. This manuscript offers an introductory overview of the historical progression, impact, and progression patterns of this particular field. Nevertheless, It is devoid of technical elucidation and analysis, giving the impression that it was taken from a chapter in a popular science book rather than a scholarly article. Furthermore, it is imperative that this study incorporates essential figures, cites more significant references, contains domain-specific analysis, and identifies challenges and research voids to bolster the article's scientific rigor.
