PML/RARA Single Fusion Probe

National Cancer Institute

Source

National Cancer Institute. *PML/RARA Single Fusion Probe*. NCI Thesaurus. Code C120387.

A set of two DNA probes designed for use in FISH; one hybridizes to either the 15q22 region containing the PML gene or the 17q21.1 region containing the RARA gene. This probe set detects the PML/RARA fusion gene.
