Thank you for the opportunity to review your work.

It is a very interesting topic and much debated in the specialized literature. The authors have put in a lot of effort, demonstrated by the rich bibliography, applied research methods and performed calculations.

In my opinion, the research questions are relevant and related to the title. Research methods are appropriate for this research. Maybe they are described in a more confusing way, but they can be understood.

From the content of the research, the author's personal contributions emerge and are identified, which we believe have both theoretical significance and practical value.

The bibliographic references are varied, current and cover a significant time span.

Best regards.
