Sustainable TOURISM: win-win-win papakonstantinidis model

General shape:

The subject of the research is relatively original.

The researcher uses a standard method

The scientific value of the research is relatively good.

The structure of the text is simple. It can be enhanced.

The clarity of the paper is decent.

The arguments are medium.

The style is simple.

Remarks of form:

- The abstract of the research is not clear, it needs to be rephrased, emphasizing its main elements: Introduction-Aims, Method, Results and interpretation
- Introduction of Research must be enriched in depth.
- The research methodology can be clarified by adding a schematic diagram to this methodology.
- Research results must be presented in a precise and detailed manner.
- The recommendations must be enriched in such a way as to serve the research subject.
- Documentation of references in the body of the research is weak.
- Absence of research literature and previous studies.
- The analysis lacks illustrations, pictures and maps.
