This manuscript can be interesting for readers and it will fit the scope of journal. I would like to suggest minor revision and re-review. I have following points:

1. Introduction is short, need to discuss the more related studies.
2. Authors need to explain why the title compound works.
3. The authors should explain the importance of the work in detail in order to attract the readership of this journal. The level of theory needs to be justified. Authors should try to give more recent Works in literature such as DOI: 10.1007/s11664-022-09730-4, DOI: 10.1016/j.ijleo.2022.168576, DOI: 10.55730/1300-0527.3464, DOI: 10.1016/j.molliq.2022.119161
4. Language needs substantial improvement.
