Wolff-Parkinson-White Syndrome

National Cancer Institute

Source

National Cancer Institute. *Wolff-Parkinson-White Syndrome*. NCI Thesaurus. Code C35132.

A cardiac conduction disorder characterized by an electrocardiographic finding of ventricular pre-excitation, which is a short PR interval and a long QRS interval with a delta wave. Most individuals are asymptomatic; however they can experience periods of palpitations, shortness of breath or syncope during tachycardic episodes.
