Potential competing interests: No potential competing interests to declare.

Your study seems interesting but it begs for an English review. I found many mistakes that impair your work.

The discussion section is still very poor and needs more references.

Please, all authors can see some comments and corrections that are necessary.

Some extra questions are below:

1. "Food and feeding" could be replaced by "feeding habits"?
2. Abstract, line 3: you put "fish scale" as a small prey, but scales are part of a fish. It makes more sense to put them together at this moment and explain in the text.
3. Versatile feeding behavior = opportunistic feeding behavior? I think the last one is more appropriate.
4. Sometimes, you use "..." or '...' to explain the word's origin. Please, choose one.
