Potential competing interests: No potential competing interests to declare.

1. Language editing needs to be done.
2. While the article classification based on themes is mentioned, there are no particular references or citations to any paper.
3. The findings of the paper are common knowledge and already a topic of discussion. The novelty of the paper needs to be clearly demonstrated.
4. Directions for future research need to be elaborated in the context of the study. There needs to be a holistic summarization based on the SLR.
5. While the title mentions Blockchain EV Payment Systems, there is very little focus on payment systems or the actual idea which the authors have is not communicated effectively.
6. Overall, while the paper may hold academic value, the draft needs an overhaul.
