Potential competing interests: No potential competing interests to declare.

This is a descriptive article, and to a great extent, original in content and design.

The title is okay as crafted.

Abstract: The authors should avoid starting a sentence with a figure. The "704 packs" should be preceded with a word. This is seen in the results section of the abstract and in the body of the results in-text.

The literature review was adequate.

Methodology: Provide the reference number and the date of approval for the ethical clearance.

Results: Adequate and in keeping with the objectives.

Discussion is okay.

Conclusion: Good.

References: There are a few old references, more than 10 years, cited.
