Potential competing interests: No potential competing interests to declare.

This article provides the factors that influence the laptop buying behaviour of students. Abstract provided is short but has covered all the aspects of the article.

The developed hypothesis are practical and useful to answer the research questions.

Few more literatures to support the formulated research questions can be added.

Provide a tabular explanation for the accepted and rejected hypothesis.

Suggestions can be provided in a separate heading named suggestions and recommendations.

Conclusion can be more precisely presented.
