The different sections of the research paper must be connected together in order to improve the readability of the research paper.

The keywords of the Abstract need to be reviewed, and some more relevant keywords need to be added.

The references mentioned in the introduction section need to be reviewed, and some more recent references relevant to the study need to be added to the introduction section. A review for grammatical errors needs to be undertaken prior to the publication of the research paper.

The references need to be validated prior to publication.

The conclusion will need refinement in line with the modified review of the literature section. A futuristic scope needs to be added to the conclusion section.

The research paper must be checked using any similarity index-checking software before publication.
