# Acidovorax facilis

National Cancer Institute

## Source

National Cancer Institute. *Acidovorax facilis*. NCI Thesaurus. Code C86087.

A species of aerobic, Gram negative, rod shaped bacteria assigned to the phylum Proteobacteria. This bacteria is motile by a single polar flagellum, oxidase and catalase positive, chemoorganotrophic, gelatinase positive and can grow on L tryptophan culture. A. facilis was originally isolated from soil and is used as a soil inoculant in horticulture and agriculture.
