Thanks for giving me the chance to review this very interesting and done article,
I have three comments:

- 1- Table #2: vaping and smoking status; were those vaping, only use vape or also smoke? it will be interesting to show in the table the number (%) of those either vape or smoke
- 2- Table #2: the # of Ever (not in past 30 day) and Past 3-day is listed, what about those in the last 12 months?
- 2- Table #3: E-cigarette product purchasing in the past 12 months, among past-12-month vapers: dose this number is a combination of a sub-set of those ever plus those Past 30-day?
