Potential competing interests: No potential competing interests to declare.

1. The fact that new artificial intelligence (AI) tools will revolutionize every aspect of human beings, and with the increasing possibility of Open AI ChatGPT generation, the innovative topics of this paper are worth encouraging.

2. Citations in articles should comply with APA 7.0, for example:(Rudolph, Tan & Tan, 2023) suggested to change into (Rudolph et al., 2023)

3. After the purpose of the research, it is suggested that the authors describe the investigative issues in this paper, which can make the results clear and focus more on the theme.

4. It is recommended that the authors use Turnitin to check the similarity of the content generated by ChatGPT and then make a comparison, analysis, and comment on the results to confirm the validity of the results.

5. The effectiveness of ChatGPT in various disciplines is meaningful for how to comment to help check the reliability of the results.

6. There is a lack of citations in relevant journal papers, so expect more people to integrate into the research.
