

Review of: "Enhancing Business Model Resilience in the Machine Tools Industry: A Case Study of ABC Company"

Zhenggeng Ye

Potential competing interests: No potential competing interests to declare.

According to the content, the article is more like a report not a research paper. Some suggestions are given as follows.

1. The definition of Business Model Resilience in the Machine Tools Industry should be given, and how to calculate it should also be provided.
2. Some Indexes should be constructed to quantize factors impacting Business Model Resilience discussed in this paper, and their impacts on Business Model Resilience should be studied quantitatively by a proper theory, such as the system dynamics.
