Moebius syndrome-axonal neuropathy-hypogonadotropic hypogonadism syndrome

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Moebius syndrome-axonal neuropathy-hypogonadotropic hypogonadism syndrome. ORPHA:2560*

This syndrome is characterized by the association of Möbius syndrome (congenital facial palsy with impaired ocular abduction; see this term) with peripheral axonal neuropathy and hypogonadotropic hypogonadism.
