

# Review of: "Is SARS-CoV-2 Spike glycoprotein impairing macrophage polarization via $\alpha 7$ -nicotinic acetylcholine receptors?"

Juan Bautista De Sanctis<sup>1</sup>

<sup>1</sup> Palacky University

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

Even though the title is appealing, the article falls short to provide a mechanism that would explain the hypothesis stated. I would suggest the authors to enhance the manuscript adding data on the receptor and the effect on macrophages and then argue about a connection. As it is written, It will not be suitable for publication in many journals
