Dear author,

thanks for your work and the opportunity to review. Both the topic and the article itself are very interesting to me. Let me leave you some comments in the hope that you may find them of interest.

I think the abstract could be refined to provide a more complete and precise idea of the overall work, especially about discussion/conclusions. Probably some examples of some entrepreneurial ecosystems related to sustainability and the main topic would be a good and clarifying improvement to the text. I think you could go deeper into the area of sustainability, making this topic more central in your research. An example is the types of entrepreneurship mentioned in chapter 3.1 and their relationship with sustainable entrepreneurship. In general, I find that the question of whether or not sustainable systems refer exclusively to rural areas or developing countries could be subject to further argumentation and concreteness of claims.

All the best.
