## BCR/ABL1 Fusion Gene with ABL1 NM\_005157.4:c.763G>A Mutation

National Cancer Institute

## Source

National Cancer Institute. <u>BCR/ABL1 Fusion Gene with ABL1 NM\_005157.4:c.763G>A</u> <u>Mutation</u>. NCI Thesaurus. Code C130211.

A fusion gene that results from a translocation t(9;22)(q34;q11) that fuses the 5' part of the BCR gene to the 5' side of exon 2 of a mutated form of the ABL1 gene. In this fusion gene there is a point mutation where guanine has been substituted with adenine at nucleotide position 763 of the ABL1 gene. This mutation is associated with imatinib- and nilotinib-resistant leukemias.
