Dear Authors of manuscript "Financial Repercussions of Carbon Emissions and Depletion of Natural Resources: The Role of Fiscal Policy in Determining Health Expenditures". Thanks for your work. The topic seems interesting. However, there are minor comments, and the paper need minor revision.

1 The authors need to modify most of the first section, the author wrote a lot of sentences without supporting references.

2 The major defect of this study is the debate or argument is not clearly in the first section. Hence, the contribution is weak in this manuscript. I would suggest the author enhance your theoretical discussion and arrive at your theoretical argument.

3 Authors should summarize literature and find out the knowledge gaps.

4 Authors should add the limitation and the future research directions.
