Potential competing interests: The author(s) declared that no potential competing interests exist.

This is an interesting review covering an important aspect of the blood-brain barrier physiology. However, some improvement might still be needed.

Minor comments

- There are several typos, spelling mistakes, and grammatical errors.
- The headings sometimes are missing.
- Figure 1 might need an update to fit better in the context given by the authors.

Major comments

- Some of the information provided in the review has been already known for some time. Thus it might be a good idea to focus on the novel findings in the field.
