Potential competing interests: No potential competing interests to declare.

1. Pancreatic Beta- cell regeneration in Type 1 diabetes is a critical claim in this manuscript and should be detailed carefully with thorough evidence.
2. The literature is not properly explored in historical background of GLP-1 agonists and involvement of DPP4-inhibitors contexts.
3. The pictorial and illustration skills of the author should be displayed in the manuscript.
4. Writing and content alignment of the manuscript is weak.
5. Add tables, figures, and charts to make your manuscript appealing.
