

# Review of: "Factors Associated with Contraceptive Use Among Migrant Female Head Porters in the Kumasi Metropolis"

Chit Su Tinn

Potential competing interests: No potential competing interests to declare.

1.	Children and Social Protection, with the oversight responsibility over vulnerable populations such as Kayayei, estimates that over 40,000 head porters are in the streets of Kumasi and Accra alone (Baah-Ennumh et al., 2012). in page 2	Please provide more updated information on this (if available)
2.	(Sharan et al., 2015; Nyarko, 2018; DHS, 2014) in page 2 (Cahill et al., 2018; Fiato, 2016; Nyongesa & Odunga, 2015; Nyarko, 2018) in page 2 (Edwin et al., 2016; Anarfi & Adjei, 2009; Opore, 2010) in page 3 *these are just examples, please revise the entire article)	Please provide citation consistently  (either alphabetically or the year of publication)
3.	Introduction: Please provide more information on factors affecting contraceptive use (general and/or in vulnerable population) rather than Ghana context specifically.	
4.	Study population: Although there is limited information on sampling frame, it would be great if you could explain on the sample size 200.	
5.	There is no information on how and why did you choose the variables, and how did you categorize them.	
6.	Results: It would be great if you include both C.OR and A.OR.	
7.	Discussion: It would be great if you can compare previous studies on factors affecting on contraceptive use and discuss.
