Dear author,

Congratulation for your article. After a careful review I have some suggestions:

1. Please revise the Abstract in order to present some more details about some of the findings; The abstract should be expanded and the authors should improve the methods, the results and the implications of the research.
1. The introduction needs to be sustained by references that lead the authors to identify the relevance of the study and the research objective and questions. Please explain why your study is relevant in the context of slum issues in Delhi.
2. Although the purpose of the paper is explicitly stated there are no objectives of this research.
3. On methodology: a discussion with only 20 women and 10 children is too few for relevant findings.
4. The literature mentioned is quite "thin". There needs to be a more thorough literature search on this topic.
5. In the conclusions, please explain the theoretical and practical implications, limitations and opportunities for further research.
6. Some of the figures are not well done or clear. in figure 4 it is not clear where the nardan Basti district is located within Delhi. Figures 3, 4, 7, 15 have no scale, legend, indication of North. Photographs do not mention the source.
