The topic is not particularly novel. Could you please provide additional literary sources? The number 14 is insufficient.

The tables contain figures that are of poor quality, on different colored backgrounds, and some of them are even incomplete due to being cut.

In the Limitation section, it is mentioned that the study does not cover other factors related to commuter safety as they are part of a larger project and are not within the scope of the present study. Could you kindly provide additional information regarding the other factors?

The explanation of statistical methodology should be expanded further, supported by appropriate references.

The consistency of the reference style is lacking. Please make them uniform.
