Acute Myeloid Leukemia with a Variant RARA Translocation

National Cancer Institute

Source

National Cancer Institute. *Acute Myeloid Leukemia with a Variant RARA Translocation*.
NCI Thesaurus. Code C36055.

A term referring to acute myeloid leukemias which show variant translocations involving the RARA gene. The variant fusion partners include NUMA1, ZBTB16, STAT5B, and NPM1. These leukemias often have the morphologic features of acute promyelocytic leukemia.
