This manuscript can be interesting for readers, and it will fit the scope of the journal. I would like to suggest minor revisions and re-review. I have the following points:

1. Introduction is short, needs to discuss more related studies.
2. What is the novelty and accuracy of the method used? Should it be added to the introduction section?
3. Authors need to explain why the title compound works.
4. The authors should explain the importance of the work in detail in order to attract the readership of this journal. The level of theory needs to be justified. Authors should try to give more recent works in the literature, such as DOI: 10.1007/s11664-022-09730-4, DOI: 10.1016/j.ijleo.2022.168576, DOI: 10.55730/1300-0527.3464, DOI: 10.1016/j.molliq.2022.119161
5. Language needs substantial improvement.
