

Review of: "AI in Healthcare: The New Frontier of Inequality"

Carol Hullin

Potential competing interests: No potential competing interests to declare.

Dear Author:

Please find my sincere and constructive feedback on your paper:

1. Logical Progression: While each section of your paper contains valuable information, there seems to be a need for a more seamless transition from one idea to the next. Ensuring that each section naturally leads into the following one will greatly enhance the reader's ability to follow and engage with your argument.
2. Building on Previous Ideas: I noticed that some hypotheses and arguments are introduced without fully drawing on the previous sections. It would be beneficial to make sure that each new point or hypothesis you introduce is clearly built upon the foundation laid by the previous ones.
3. Consistent Theme and Focus: As you transition between sections, keep a consistent theme and focus. This will help in reinforcing your central thesis and ensure that all sections collectively contribute towards a persuasive conclusion.
4. Explicit Linkages: Consider explicitly stating how each section or hypothesis is linked to the next. This can be achieved through transition sentences at the end or beginning of sections, which guide the reader on how the paper is progressing logically.
5. Conclusion Reinforcement: In your conclusion, make sure to succinctly recapitulate how each section contributed to your overall argument. This reinforces the logical progression of your paper and leaves the reader with a clear understanding of how you reached your final conclusions.

Wishing you all the best in your academic journey.
