The research paper is very well-written and comprehensive. However, there are a few ideas that can be incorporated into the write-up:

1. The conceptual framework presents the term "quality of education," while in the paragraph it is mentioned as "academic achievement." I recommend using one term consistently.
2. In addition to this, if academic achievement is termed as quality of education, an operational definition should be given in the paragraph of the introduction.
3. The regression model can be presented in the form of a figure for more clarity.
4. The names of the schools in the target sample and the sample of the study can be moved to an appendix.
5. The sample can be presented in the form of a figure or table for more clarity for the reader.
