Dear authors,

I think your article is very useful for gaining human insight into waste-related issues.

Do your data have a normal distribution for which you performed a parametric test? Or have you done a normality or homoscedasticity test?

Have you tried other statistical tests, e.g. similarity, multiple regression and/or descriptive test, to check for similarities and further descriptions of your data? Also, to show your statistical results, always prefer, when possible, to show them in graphs (e.g. boxplot/barchart) to appeal to the public who will read your manuscript.

All in all, though, I enjoyed your article and I hope you'll be able to make more progress on this subject.

All the best
