

# Review of: "Communicating Cutting Edge Research on Physiological Networks: A Three-Step Method"

Antonio Cortés-Castillo<sup>1</sup>

<sup>1</sup> Universidad de Panamá

**Potential competing interests:** No potential competing interests to declare.

In general, the document is well structured and articulated. This can be read in a simple and clear manner. The ideas and objectives set out by the authors through the three-step method are fulfilled when applied in the editing and publication of the videos, as well as in their content and the target population for which they are intended.

**Recommendation:** Accept.
