

Review of: "A Review of Informal Employment Research"

Nitu Jaiswal

Potential competing interests: No potential competing interests to declare.

This paper is simply a literature review on Informal employment particularly on female informal market. Though the paper mention about the COVID-19 impact on women market it fails to highlight the ground impact on female. Even work-from Home (WFH) female conditions (taking care of household work along with office pressure) literature may be included. Rest the effort of the author is highly appreciated.
