Consciousness (Conciencia)

Marco Antonio Morelos Navidad[1]

1. Ciencias Biologicas y de la Salud, Universidad Autónoma Metropolitana, Mexico

EN. - Consciousness is the **capacity of a biological system** —and, in principle, of *other sufficiently complex systems*— to **generate, maintain, and operate states of subjective experience,** or formally equivalent states, that are globally accessible through the *dynamic integration* of *sensory and endogenous information.*

ES. - .La conciencia es la **capacidad de un sistema biológico** —y, en principio, de *otros sistemas suficientemente complejos*— para **generar, mantener y operar estados de experiencia subjetiva**, o estados formalmente equivalentes, que resultan globalmente accesibles mediante la *integración dinámica* de *información sensorial y endógena.*
