Authors presented "Report of unexpected findings after cardiac stem cell injections in a preclinical model".

Presented study aimed to investigate cardiac cell retention improvements when using ureido-pyrimidinone units (UPy-gel) as a cell carrier. However, unexpected results were discovered during the experiment. The report is interesting and valuable for this type of research.

General comments:

The introduction should be improved, and findings should be described in the Results or Discussion sections. There are grammatical and punctuation errors found in a text that should be revised.

In general, a protocol is well described, the findings are interesting, in conclusions, the authors provide valuable advice to other researchers.
