Potential competing interests: No potential competing interests to declare.

Your article is well designed and working with this group of patients is appreciated.

Please consider some points to achieve better results.

1-Revise the exclusion criteria. The cases that lead to exit from the investigation should be considered.

2-The position of Kegel exercises; Is supine the most effective position?

3-It would be great to chose some photos of participants for exercise protocol.

Healthy Regards
