IgG Phospholipid Unit

National Cancer Institute

Source

National Cancer Institute. *IgG Phospholipid Unit*. NCI Thesaurus. Code C67347.

A unit for semiquantitative measurement of IgG autoantibodies to proteins associated with negatively charged phospholipids evaluated in ELISA serum anticardiolipin or anionic phospholipid assay against an established reference standard. One IgG phospholipid unit is equivalent to one mg/mL of an affinity-purified standard IgG sample obtained from specified individuals.
