Review of: "Human Exposure to Arsenic and Toxic Metals Through Meat Consumption in Africa: A Review of Scientific Literature"

Priynaka Dey Suchi¹

1. Environmental Science, Bangladesh Council of Scientific & Industrial Research, Dhaka, Bangladesh

The sentence making and grammatical error should be checked properly throughout the whole manuscript.

Abstract

1. Concentration of different toxic metals found at different organs need to be included.
2. Please mention the exposure guideline value

Introduction

1. There is a line "These toxic elements can enter the animal through various pathways and accumulate in tissues." Here pathways need to be included and related references need to be cited.
2. The article is about consumption of meat, but in introduction , consumption of fish and sea food has been mentioned. Please check relevancy of those lines with the article subject.
3. Human exposure must be expressed through human health risk which includes carcinogenic risk and non-carcinogenic risk, health hazard index which are missing in this manuscript. Please check this reference below to get idea

<https://www.sciencedirect.com/science/article/pii/S2405844024085736>

4. While discussing the values or concentration found in different organ should be included the standard deviation which reflects the actual result.

Conclusion

It should reflect the overall summary of the findings from 2000–2024.
