Carcinoma of gallbladder and extrahepatic biliary tract

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Carcinoma of gallbladder and extrahepatic biliary tract. ORPHA:56044*

Carcinoma of the gallbladder (GBC) is the most common and aggressive form of biliary tract cancer (BTC; see this term) usually arising in the fundus of the gallbladder, rapidly metastasizing to lymph nodes and distant sites.
