Therapeutic Gonadotropin

National Cancer Institute

Source

National Cancer Institute. *Therapeutic Gonadotropin*. NCI Thesaurus. Code C527.

A class of formulated therapeutic analogs of the endogenous gonadotropin that stimulates or promotes the function of the gonads. Therapeutic gonadotropins are derived from animal or recombinant sources. Gonadotropins include follicle-stimulating hormone, luteinizing hormone and chorionic gonadotropin. These agents stimulate discrete cellular components of the gonads, exerting effects in both males and females. (NCI04)
