The research topic is good, as it gives the theoretical background of semantic systems theory. The authors are proposing a novel semantic systems theory different from existing theories. However, I have noted the following;

- The abstract is too short with only two lines. I suggest enhancement of the abstract.
- Second the paper should be organized with sections such as introduction, related works, methodology etc.
- The authors also need to describe how their proposed theory is different from existing theories while highlighting the strengths of their proposed theory.
