Potential competing interests: No potential competing interests to declare.

1- What is the exact novelty of the presented model for reliability formulation compared to papers published at <https://doi.org/10.1016/j.ijepes.2022.108688> and <https://ieeexplore.ieee.org/abstract/document/5955422>. Please explain in the Introduction section.

2- More papers in the related field should be reviewed to improve the Introduction.

3- The proposed methodology must be tested on at least two test systems and results should be compared to some existing methods in the field.
