Dear author,

First of all, based on the full paper, maybe you could change the title of it. The title is focused on Digital UAE, but the text is more about the general demographic. In the abstract, try to change 'this' and 'problems' with explanations of 'what' and 'which.'

Generally speaking, the advice is to not put figures and tables or figures and figures, tables, and tables one after the other, in other words, without some text between those two (in the paper figure 2 and table 2)

Figure 3 has missing parts (numbers, percentages, etc.)

Check the reference list and put the title and explanations for the links.

Overall, the paper has potential- an exciting topic.
