Potential competing interests: No potential competing interests to declare.

Manuscript discussed the analysis of heavy metal pollution. Before accepting the manuscript, some parts need to be modified. Following are some suggestions the author needs to incorporate:

1. English language needs to improve.
2. Figure 1 caption shows the location and sampling procedures of the study area, but there is nothing in the figure.
3. Mention the novelty of the work.
4. Compare the obtained results with existing results.
5. From which standard data has the author compared the maximum permissible limit of elements?
6. The author has mentioned the threshold level; what it means and what the threshold levels are for different heavy metals.
