

Review of: "Toxicity of Olea africana in Artemia Salina and Mice"

Shambaditya Goswami

Potential competing interests: No potential competing interests to declare.

The authors' have justified the aim and objective of the research. The research protocol, methodology, statistics, results and discussion are relevant, precise and acceptable.

Comments:

1. Abstract: Numerical data/ statistical data may be avoided
2. Abstract: Missing problem statement.
3. Collection of the plant: The collection time of the plant parts may be specified. Voucher Specimen no./Reference no may be mentioned in the text.
4. Sample preparations: The percentage yield may be reported
5. Sample preparations: Why only ethanolic extracts? May be mentioned.
6. Animals used in the experiment: The identification details may be reported for Artemia salina.
7. Conclusion: The authors may write it in more precise way by adding future aspects.

Rectification by considering the above mentioned suggestions/comments, the manuscripts may be accepted for publication.
