# Sth1p

National Cancer Institute

## Source

National Cancer Institute. *Sth1p*. NCI Thesaurus. Code C19855.

A DNA helicase component of the abundant RSC chromatin remodeling complex, Sth1p has a bromodomain and belongs to the SNF2/RAD54 helicase family. Sth1p is essential for mitotic growth and meiosis and is involved in G2 phase control. (from SWISS-PROT P32597, SGD S0001388, and NCI)
