Potential competing interests: No potential competing interests to declare.

1. The reviewed article is generally sound in terms of theoretical framework and methodology.
2. The analysis of data and resulting findings is presented accurately and clearly.
3. The content of the article fits well within the thematic scope of the journal.
4. Conclusions drawn from the data and their relevance to the research questions are logically and convincingly presented.
5. The article does not require significant changes in terms of linguistic and literary revisions.
6. Suggestions and recommendations for future research are reasonably proposed and contribute to the further development of the discussed topics.
7. The sources cited in the article are fully and appropriately referenced.
8. The scholarly integrity of the article and its contribution to the discourse in the field is valuable.
9. The structure of the article encourages deeper understanding of the content for the reader.
10. Overall, the article is deemed worthy of publication in the journal as a valuable and insightful contribution.
