Traumeel S

National Cancer Institute

Source

National Cancer Institute. *Traumeel S*. NCI Thesaurus. Code C38683.

Diluted extracts isolated from plants and minerals, including belladonna, arnica, St. Johns wort, and Echinacea. As a homeopathic mouth rinse preparation, Traumeel S exhibits antiinflammatory activity; the mechanism of action has not been fully elucidated. This agent may reduce the severity and duration of treatment-related stomatitis. (NCI04)
