Polyvinylpyrrolidone-Sodium Hyaluronate Gel

National Cancer Institute

Source

National Cancer Institute. *Polyvinylpyrrolidone-Sodium Hyaluronate Gel*. NCI Thesaurus. Code C61593.

An oral bioadherent gel containing polyvinylpyrrolidone (PVP) and sodium hyaluronate with muco-protective activity. Upon oral application, this gel adheres to the mucosal surface of the mouth and throat, forming a thin layer that acts as a barrier to protect exposed and sensitized nerve endings from the painful stimuli associated with eating, drinking, and talking.
