Review of: "Analyzing Students' Perceptions of Collaborative Tools for Automated Assessment of Programming Assignments in Distance Education"

Dr. Anand Nayyar[1]

1 Duy Tan University

The Research Paper needs the following revisions and is subject to re-review, and after re-review, the final decision for the paper will be made:

1. Abstract- Add in the last lines what %age and in what parameters the proposed methodology is better as compared to existing techniques, and what the overall analysis is.

2. Add more information towards background, scope, problem definition, and other technical information. Add Objectives at the end of the Introduction and then add Organization of the paper.

3. At the end of related works, highlight in 9-15 lines what overall technical gaps are observed that led to the design of the proposed methodology.

4. Add future scope to the paper.
