Thank you for the opportunity to review this article.

The scope of this article is greater; however, the following areas need to be rectified and modified to enhance the acceptability of the article:

"H1: There is a strong relationship there is a positive relationship between access to finances and MSMEs' sustainable development" - The formation of H1 needs to be corrected, as it mentions both strong relationship and positive relationship.

For H1 - H5, the hypotheses mentioned the strong positive relationship, however, the purpose of the correlation is to find out the degree of relationship between the variables, therefore, the hypotheses can be written like "there is a relationship exists between...".

The sampling method is incomplete. The study does not mention the population, sampling frame, technique, or method.

The correlation values hardly show a positive correlation between the variables. A table explaining the hypotheses may be useful in understanding the result and analysis.

Good Luck
